

Team Affidavit – Birth Certificate Check Process

How to Set Up your book so you are done in the 45 minute approval process

Use a 3 ring notebook. Use sheet protectors.

DO NOT include anything that says something similar to “12u”. There is no “12u” in Little League. Use the correct level naming convention as stated on the top of the front page of the Team Affidavit.

Order of placement in notebook:

- Tournament verification checklist
- Tournament Team Eligibility Affidavit
- Combined league form (if applicable)
- Boundary map
- Tournament Player Verification with supporting documents
- Manager and coaches certificates for Diamond and Abuse training
- Medical releases

1. Tournament verification checklist

- a. Fill out league id # - League name - division
- b. List the player names in the same order as what you place them on the map
- c. Check off box that you have included the boundary map
- d. Add the age of the player.
- e. **D8 will fill out the remaining boxes which indicate paperwork submitted for residency or school enrollment, and waivers.**

2. Tournament Team Eligibility Affidavit

- a. Page 1 – Fill in League president’s day and mobile/home telephone numbers. Fill in league ID number. Fill in name of league, city, state, and country. Check the box for the level of play.
- b. Page 2 – Need the signature of the manager with date, fill in the name of the president and player agent, and have the president and player agent sign and date.
- c. Page 3 – List the name of the teams in the division, with the number of games scheduled and played (forfeit or scheduled and not play do not count), regular season division played in, and league ID number.
- d. Page 4 - At the top of page, list the manager name, email address, team code where they managed/coach during regular season, and phone numbers where they can be reached. Do the same for the 1 or 2 coaches.
- e. Page 4 and 5 – List the order of the players with the name number that was used on the boundary map. Use the example of entering the information per the listing at the top of page 4. **NOTE: The player name must be the same as what is on the birth certificate** – you may ignore the middle name or just use the initial. **Note:** The number of games played by the player is the number they actually participated in, not the total games the team was scheduled for and played.
- f. The remaining pages of the affidavit are left blank. Please print each page separately and when stapling together, turn the pitch count sheet backwards so it is easily available to report information at the end of each tournament game. **Put the form in its own sheet protector**
- g. **PRINT SINGLE SIDED!**

REMEMBER – It is easier to add a player rather than delete them. If at the affidavit check you are uncertain about a player, don't put them on. (if you have the information or partial information, keep that info in the back of the notebook.) Once a player is on the affidavit and deleted, they can never come back to join the team. You always have the ability to add a player if they have met the qualifications.

3. Combined League form

- a. If the team is a combined league team, include the Combined League Form here, printed out from the Data Center, once its been approved.

4. Boundary Map

- a. When entering information on #4 – tournament affidavit – the system should automatically produce the boundary map. It should show the information that is listed in b and c below.
- b. The second page will be the number and the player name and address information. By filling in the second page first, it should automatically plot the player number on the map. If using the school enrollment form for the residency requirement, use the school address for the player. **If the player has moved and II(d) is being used, the address or school residency needs to be the player's prior address/school residency.** Mark the box for the II(d). The player's info will match the number order on the boundary map to the same number order on the affidavit.
- c. First page is the boundary map marked with the number of the player (which will be listed on the second page) to the location of where they live. The president needs to sign and date this page.

5. Tournament player verification form

- a. If the player is a returning player, add the form. It should have the verification form, a copy of the birth certificate, the proofs of residency/school enrollment form, and II(d) if was required. If the player has the form for a prior year and did not play All-Stars last year – it is very helpful that you use a sticky note that indicates that the player played regular season in that prior year and has not broken service with the league.
- b. New players for All-Stars - Fill out the following:
League name League ID number
Player name (as shown on the birth certificate) and their birthdate
Mark the type of age proof – 99% should mark "board of health/registrar" box

You will only use one of the two- residency proof or school enrollment proof. You do not fill out both.

Please note that for the residency proof that you need **one item from each of the 3 groups**. To make it easy, obtain a driver's license, a mortgage statement, and a utility bill. Then you have covered all 3 items. The address listed on these items must agree to the street address of the parent/guardian and the boundary map and the name on the account must be the parent/guardian. If the player and family is living with a relative or other persons and they pay the bills, those will not be acceptable as proof. **All proofs must be dated between Feb. 1, 2024 and Feb. 1, 2025** or as in the case of a driver's license, be enforce during those dates.

OR

For the school enrollment form section add the school name (not a line on the form), with the school address.

The parent needs to print their name, sign and date.

The league president needs to print their name, sign and date.

c. School enrollment form (only if not using the 3 proofs of residency)

- a. Note – this should have been filled out prior to or on October 1st, 2024.
- b. Fill in the league name, league ID #, player name and player date of birth
- c. Fill in division of play, parent/guardian address, printed parent/guardian name and signature and dated
- d. The school administrator will fill out the middle part of the form, with the name of the school, address and phone number. The year should be 2024-2025 and the date that shows when the student was enrolled. The administrator needs to sign, date and give their title.
- e. If the player has changed schools from last year and used the school enrollment form as the proof of residency, a ll(d) form is needed.

d. Birth certificates

For new players or those who don't have the player verification form from prior years, district needs to see the **original birth certificate and be provided with a copy**. Please put the original in its own sheet protector so the district can review it. When the affidavit is completed and district has signed off on the birth certificates, please return the original immediately to the parent/guardian.

e. Player information

The order of the player information is as follows:

- a. Player verification form with 3 proofs of residency or school enrollment form
- b. If needed – supplemental tournament affidavit sheet (mostly used for the upper divisions of play).
This form indicates school games played that help qualify the player for All-Stars that did not meet the Little League game participation. All divisions must have played in 8 games of the regular season
- c. Original birth certificate **(in its own sheet protector), with a copy of it as well.**
- d. ll(d) waiver - if required. Good idea to put b, c, and d in its own sheet protector.
- e. Out of Boundary waiver approved from the Charter Committee, if needed.
- f. Items d and/or e should be automatically checked via the Affidavit, if they are needed

6. Certificates for each of the Manager and 2 assistant coaches: Diamond Leader and Abuse Awareness training

7. Medical releases

The medical releases can be kept in its own tab in the notebook binder. District just needs to see that they have been done and are not part of the player verification form packet. Medical releases always need to be done each year and carried by the manager to all games to present to game officials.

8. Other information to note:

If a player has not played in all scheduled regular season games due to an injury and is picked for the All-Star team, include a note from the doctor and parent as to why they were unable to play. The doctor's

note should include the date that the player was released from doctor care and now able to play. This will let the player participate in All-Stars even though they did not play in 8 of the regular season scheduled games. They will have needed to play in 8 of the games that they were able to participate before/after the injury.

A II(d) waiver form is required when the player moves to a new address anytime after the end of the prior season. The form is needed for the following:

- a. Change of address within the same Little League boundary (ie – moved within the Magnolia LL boundary to a new address)
- b. Change of address outside of the Little League boundary but wants to continue to play with the same league.
- c. Changed schools if used the school enrollment form as proof of residency.

The II(d) form must include the 3 pieces of residency from the old residence or the school enrollment form from the prior school.

Out of Boundary waiver approved from the Charter Committee, if needed.

Your league president will fill out these forms and should have already done so at the beginning of the season.

SIGNATURES:

- League President must sign the Team Affidavit, the map, and each Player Information sheet
- League Player Agent who assembled the documentation must sign the Team Affidavit.
- Parent must sign the Player Information sheet
- Manager must sign the Team Affidavit.
- District Administrator and/or ADA will sign off on each Player Information sheet and the Team Affidavit when all is approved. Any missing documentation or signatures will result in the Team Affidavit not being signed/approved and you will need to resubmit.
